PALA

betoni | betong | concrete

PALA concrete furniture is a reliable choice. The products are manufactured in Finland, at our own factory. The company's values reflect innovation, sustainability, and Scandinavian design. These same values are reflected in our massive, weather-resistant products. The stylish and safety-enhancing furniture is designed for both outdoor and indoor use, as well as for public and private spaces. In addition to the PALA collection, we manufacture custom furniture on request and ensure their functionality and safety before production.

Certified to ISO9001, ISO14001, and AQAP 2110 standards, we ensure the highest levels of quality, environmental responsibility, and reliability.

DWG drawings of our products are available upon request:

Custom Orders

We also manufacture custom-made products to order. You can provide us with ready-made plans or drawings, and, if necessary, we will review their functionality, safety and feasibility before production. Alternatively, you can simply tell us about your ideas and requirements for concrete furniture, and our experienced designers will turn them into detailed plans for production.

We welcome challenges and tackle them with unwavering courage and enthusiasm. This is how we learn, develop and grow. We want to stand out as a bold and reliable manufacturer and partner for landscape architects, designers and construction companies.

All our concrete furniture is manufactured at our factory in Vehmaa, Southwest Finland.

Science Centre, Finland
Custom concrete exhibition elements

Accessories

Our products can be equipped and customized with the attached accessories according to the customer's wishes:

- Wooden covers
- LED lighting
- Charging point / mains
- Charging point / solar panel
- Concrete color
- Heating on a concrete bench
- Anti-graffiti treatment
- Armrests / roster
- Holes for forklift

PALA Flow

~ when water inspires design ~

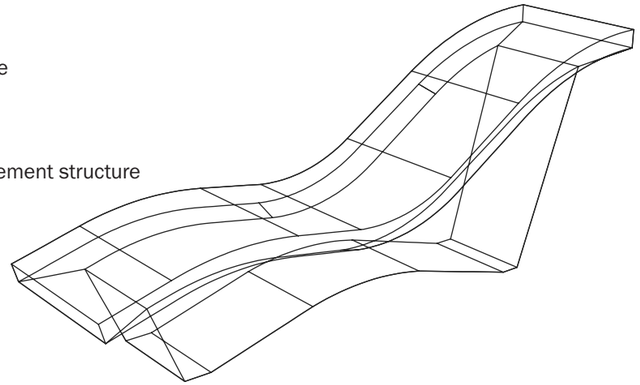

PALA Flow is a multifunctional concrete furniture collection inspired by the movement of water. Its sculptural form brings rhythm and character to urban spaces while combining seating, greenery, safety, and environmental functionality into a single solution.

The collection consists of six modular concrete elements that can be combined into versatile configurations tailored to different urban environments and project requirements.

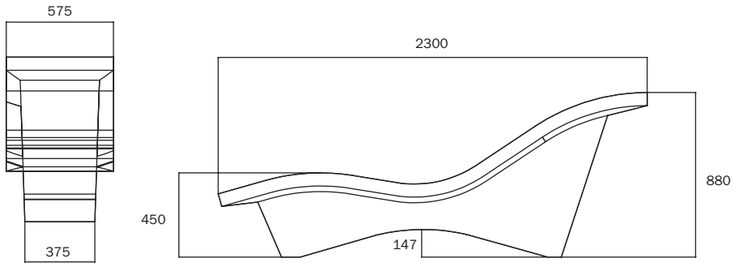

Flow elements are produced in precast concrete designed to meet the technical, aesthetic, and durability requirements of each project. Various colours and surface finishes are available.

Flow serves simultaneously as:

- Seating and social gathering furniture
- A planter and greenery feature
- A space-defining element
- A vehicle barrier and safety solution
- A future-oriented stormwater management structure

Dimensions (L × H): 2300 × 880 mm
Width: 375-575 mm
Seat height: 450 mm
Centre arch height: 147 mm
Mass: ~900 kg

Floating Finland

Your Trusted Partner for Floating Infrastructure Projects

Since 2015, Floating Finland has been the trusted partner for floating construction projects. We bring our expertise to the table from the very beginning, helping solve challenges already at the design stage. With experience across a wide variety of projects, we pride ourselves on delivering smooth, professional collaboration and lasting value to our clients.

Floating Solutions

We provide complete floating infrastructure solutions — from design to installation. Our expertise covers floating waterfront structures for recreational, commercial and technical applications as passageways, bridges, breakwaters, artificial islands, leisure platforms, dual-use products and a wide range of other floating solutions. Operating across the Nordics and the Baltics, we deliver reliable, high-quality projects tailored to your needs.

Quality

We design every project to meet our clients' needs with professionalism and cost efficiency. Certified to ISO9001, ISO14001, and AQAP 2110 standards, we ensure the highest levels of quality, environmental responsibility, and reliability. Quality is at the heart of our work, and every product is proudly manufactured at our own factory in Vehmaa, Finland.

Service & Maintenance

Our maintenance and repair services keep your floating infrastructure performing reliably and protect the long-term value of your investment. We handle both scheduled and damage inspections, providing tailored reports to your specifications, or design comprehensive 10- and 20-year maintenance programs to give you complete peace of mind.
